About see more online: arigunz.com/about

Ari Gunzburg experienced trauma at a young age, when a teacher passed away while hiking on a field trip. Only a few years later Ari made a series of bad decisions, earning his "PhD" from the school of hard knocks. Ari dropped out of high school, did crazy things and more, all while figuring out the answers to life, the universe, and everything (got a towel?).

After more than a decade working in marketing, branding and websites, Ari is now focused on inspiring others to greatness – inspiring kids to make better decisions, and inspiring adults to build lives of meaning. Ari is happily married, raising four children, and motivating people everywhere with his speeches and workshops.
